MOBILE LIFTS

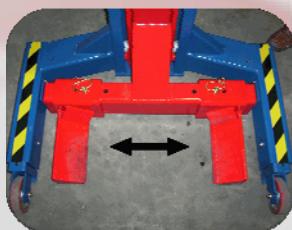

Extendable column legs
to engage double wheeled
trucks.

Equalization and lift operation
controlled by PLC or PC board
controls.

Columns built from 2 or 4 tube
construction or 7/8" fork lift mast
channel and fortified with 1/4"
thick formed channel for
unparalleled column strength.

Adjustable forks to
accommodate vehicles
with varying tire
diameters.

Lift Capacities range from
48,000lbs to 240,000lbs!
